Catalog

NauticDock

Multifunctional modular floating system

Endless possibilities!

NauticDock's modular floating system is suitable for a variety of applications on the water, like a work raft, pontoon, boatlift or jetskidock.

Assembly and installation

The assembly is easy to do yourself. All you need is the special Assembly Tool (page 14). Prefer to outsource the installation? No problem! Your dealer can tell you more about this.

Dive-on Boatlift

A boatlift has many advantages. The jetski or motorboat is stored dry all year round, so (algae) growth has no chance. This reduces the maintenance of the vessel.

De mogelijkheden zijn eindeloos!

Het modulaire drijfsysteem van NauticDock is geschikt voor uiteenlopende toepassingen op het water, zoals een werkvlot, bootlift of waterscooter dock.

Montage en Installatie

De montage is eenvoudig zelf uit te voeren. U heeft hiervoor alleen de speciale Montage Tools nodig (pagina 14). Liever de installatie uit handen geven? Dat kan! Vraag uw dealer om meer informatie.

Dive-on Bootlift

Een bootlift heeft veel voordelen. Uw boot ligt het gehele jaar door droog gestald, waardoor (alg) aangroei geen kans krijgt. Het onderhoud wordt hierdoor beperkt.

Unendliche Möglichkeiten!

Das modulare Schwimmsystem NauticDock eignet sich für verschiedene Anwendungen auf dem Wasser, beispielsweise als Arbeitsfloß, Bootslift oder Jetski-Dock.

Montage und Installation

Die Montage ist ganz einfach. Sie benötigen lediglich das Montagewerkzeug (Seite 14). Möchten Sie die Installation nicht selbst durchführen? Kein Problem! Näheres hierzu kann Ihnen Ihr Händler sagen.

Dive-on Boot-Lift

Ein Bootslift bietet viele Vorteile. Ihr Boot wird das ganze Jahr trocken gelagert, wodurch (Algen-)Wachstum keine Chance hat. Der Wartungsaufwand ist daher gering.

Jetski Dock
A NauticDock platform for a Jetski has a standard width of 1.5 meters. The length of the dive-on system is always 0.5 meters longer than the jetski itself. It is possible to connect multiple docks to each other.

Een NauticDock systeem voor een waterscooter heeft een standaard breedte van 1,5 meter. De lengte van de bootlift moet altijd 0,5 meter langer zijn dan de waterscooter. Het is mogelijk om meerdere bootliften aan elkaar te koppelen.

Eine NauticDock-Plattform für einen Jetski hat eine Standardbreite von 1,5 Metern. Die Länge des Docksystems ist immer 0,5 Meter länger als der Jetski. Es ist möglich, mehrere Docks miteinander zu verbinden.

Boatlift
A NauticDock boatlift for a motorboat has a minimum width of 1.5 meters and is suitable for inboard and outboard motorboats. To get onto the dock, you gradually accelerate until the boat is completely on the system.

Een NauticDock bootlift voor een motorboot heeft een minimale breedte van 1,5 meter en is geschikt voor in- en outboard motorboten. Om op de bootlift te komen geeft u geleidelijk aan gas, tot de boot volledig op het systeem ligt.

Ein NauticDock Bootslift für Motorboote hat eine Mindestbreite von 1,5 Metern und ist für Innen- und Außenbordmotorboote geeignet. Um auf die Plattform zu gelangen, beschleunigen Sie langsam, bis das Boot vollständig auf dem System liegt.

Pontoon
NauticDock floats are very strong, highly buoyant and lightweight. This makes them ideally suited as a work raft/pontoon. Standard floats have a height of 0.40 meters, the low floats have a height of 0.25 meters.

De NauticDock drijvers zijn zeer sterk, hebben een groot drijfvermogen en zijn licht van gewicht. Hierdoor zijn ze uitermate geschikt als werkvlot. Standaard drijvers hebben een hoogte van 0,40 meter, de lage drijvers hebben een hoogte van 0,25 meter.

NauticDock-Schwimmer sind sehr robust, schwimmfähig und leicht. Dadurch eignen sie sich ideal als Arbeitsflöße/Pontons. Standard-Schwimmer haben eine Höhe von 0,40 Metern, die niedrigen Schwimmer eine Höhe von 0,25 Metern.

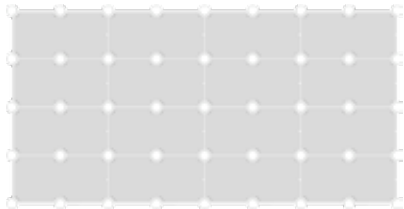

Pontoon

All prices exclude delivery and installation.

2,0 m x 4,0 m

art.nr. 101-0

Size: 412 x 212 cm
